BLEDEM-CP

SPECIFICATIONS

DESCRIPTION

The BLEDEM-CP is a UL Classified LED emergency driver that allows the same LED fixture to be used for both normal and emergency operation. In the event of a power failure, the BLEDEM-CP switches to the emergency mode and operates the existing fixture for 90 minutes. The unit contains a battery, charger, and converter circuit in a single can and will provide constant power output to the load during emergency operation.

Improved Self-Diagnostic Feature

The Tru-Sine Wave micro inverter systems for powering up to 220 Watts/250VA of incandescent, fluorescent, induction or LED lighting loads. Pulse width modulated (PWM) output design provides clean, 60 Hz. sinusoidal emergency power to lighting loads. Models are available for surface, recessed or T-Grid mounting as required.

- Benefits & Features
- Powers LED, induction, incandescent and fluorescent fixtures
 - Pure sinusoidal output eliminates compatibility issues
 - No need to de-rate for LED loads
 - Universal 120/277VAC, 60 Hz.
 - Install up to 1000ft from controlled fixtures
 - Surface, recessed or T-Grid mounting
 - Lumen output from fixtures is 100% of nominal
 - Compatible with dimming ballasts and drivers
 - Emergency fixtures can be on, off or switched
 - 90 minute runtime
 - UL924 Listed

The self-testing and self-diagnostic (SD) option is becoming increasingly more important to architects, engineers and building owners as they become more aware of its tremendous value-added functions and safety-assuring technology. UL Listed to meet NFPA 101 for self-testing and self-diagnostic requirements.

LPS INVERTERS

Midsize-electrical inverter systems for powering 375 up to 600 watts of incandescent, fluorescent, induction or LED lighting loads. Pulse width modulated (PWM) output design provides clean, 60 Hz. sinusoidal emergency power to loads. All models are designed for fast, easy wall mounting.

Benefits & Features

- For powering incandescent, fluorescent, induction and LED fixtures
- Sinusoidal output eliminates compatibility problems
- Universal 120/277VAC, 60Hz. input/output
- Unit capacities up to 600 watts
- “Soft Start” design reduces fixture inrush current
- Unit may be installed up to 1,000 feet from controlled fixture(s)
- Lumen output from fixture is 100% of nominal
- Unique design eliminates compatibility problems with LED drivers as well as fluorescent and induction ballasts
- Compatible with dimming ballasts
- Normally-ON and/or Normally-OFF load output
- Provisions for local switching capability – Always on during emergency conditions regardless of local switch position
- Emergency fixtures can be ON, OFF or SWITCHED
- Solid-state, line latched low voltage disconnect provides protection against battery deep discharge
- Long life, maintenance-free lead-calcium battery
- Momentary test switch
- AC-ON, Charge-ON and Inverter-ON LED indicators

The Tru-Sine Wave design, LED Compatible. Prewired with easy reusable connectors for fast installation and modular replacement of any component. Industry leading warranty with NO factory startup required. CEPS lighting inverters are a powerful, reliable, and cost effective way to meet emergency lighting and life safety requirements for a wide range of applications.

- Benefits & Features
- Operates fluorescents, dimmable fluorescent ballasts, CFL, LED, halogen & incandescent loads.
 - Self-resetting overload protection and fused output
 - Automatic Output Voltage Tracking maintains output voltage at full load \pm 3%
 - 120VAC or 277VAC Pure Sine Wave Output 350W load for 90 minutes
 - Sealed Lead Calcium batteries provide long life and are maintenance free
 - 3/6 Warranty (3 year replacement warranty on electronics, 6 year pro-rata warranty on batteries)
 - Automatic low voltage battery disconnect, deep discharge protection, over- temperature shut down, and reverse polarity protection.

Model	Watts*	Input/Output Voltage	Output Breakers	Options
CSC	500 1000	120 (120VAC) 277 (277VAC)	ICB (standard) #CB**	ATS = Self Test STATUS = Dry Contacts

*Capacity for 90 mins. Derate by 15% to reduce inrush related issues.
**One 20A output breaker comes standard. Up to 5 additional ay be added for total of 6.
